|  | Total Number of Meals |  |  |  |

## EMERGENCY FOOD SHELF

Prepare for the winter months and other emergencies! Never leave your cupboard bare. Every cupboard should have an emergency food shelf for those times when either illness or poor weather conditions prevent you from shopping. When planning your emergency supply, include enough food for approximately three days.

Plan ahead!... Don't wait until the first snow. Here are some other helpful things in stocking your emergency shelf.

- Purchase foods when they are on sale and buy generic brands
- Suggest to friends, relatives that these items make good gifts
- Be sure to have several items from each of the food groups
- If your doctor has prescribed a special diet, take special care in selecting foods for your emergency shelf
- For individuals on a low sodium diet, rinse your canned vegetables, tuna, and meats or select vegetables without salt, reduced sodium soups and peanut butter with no added salt
- People with diabetes should avoid fruits canned in heavy syrups, fruit nectars and canned puddings. It's a good idea to keep a can or two of regular or diet 7-Up or Ginger Ale on hand for times of illness.
- Non-food essentials to keep with supplies: can opener, knife/scissors, paper towels, hand wipes or hand sanitizer, eating utensils/ paper plates

## EMERGENCY FOOD SHELF IDEAS
